As we would expect, Jen said that it is not intended to be shared. You wouldn't be able to receive the .pdf, then email it to someone else.

However, we talked about how some devices can share material by being linked, in which case, if someone linked to your computer, or your reader device, you would be able to share it that way.

... Sorry for the not-so-straight-forward answer, but it's what I got out of Jen.

Hope all is well with you,
Talk w. you in a bit,

Tom,

I have a hard copy, but would also like an electronic copy. What are the rules on distributing electronic copies? Can I provide a pdf to others in my organization? What about persons outside my organization. Just curious how this works.

dave

Subject: SETAC - reminder to indicate your preference for receipt of our work - Pesticide Risk Assessment for Pollinators

All,

At the end of May I sent around a spread sheet around and asked everyone to indicate whether their preference is to receive a copy of our work, Pesticide Risk Assessment for Pollinators, as either an e-copy or hard copy.

I didn't receive a response from you and so, and providing this reminder.

On the attached excel file, please let me whether you prefer an e-copy or a hard copy. If you prefer a hard copy, please also provide a mailing address. (You'll note that the list I've attached is not the full list of the Pellston participants. It has been modified so that the addresses that I've received so far are protected from being sent around publically.)

I am compiling the preferences and sending it on to SETAC, who will send out the complementary copies.

The book is being distributed by Wiley, the publisher, see:

<http://www.wiley.com/WileyCDA/WileyTitle/productCd-1118852524,subjectCd-LSC0.html> .

Again, on behalf of Dave and I, congratulations to everyone.

Despite the time that has passed between the Workshop and now, the Pellston Workshop, without doubt, was a very important effort and a significant contribution, at a global level, to the protection of pollinators.

Kindest regards,
Tom Moriarty
US EPA
